

434. Number of Segments in a String

[Add to List ▼](#)[Question](#)[Editorial Solution](#)[My Submissions \(/problems/number-of-segments-in-a-string/submissions/\)](#)

Total Accepted: **8482** Total Submissions: **22578** Difficulty: **Easy** Contributors: **love_FDU_llp** (/love_fdu_llp/)

Count the number of segments in a string, where a segment is defined to be a contiguous sequence of non-space characters.

Please note that the string does not contain any **non-printable** characters.

Example:

Input: "Hello, my name is John"

Output: 5

```
1 class Solution(object):
2     def countSegments(self, s):
3         """
4         :type s: str
5         :rtype: int
6         """
7         words=re.findall('([^\s]+)',s)
8         return len(words)
9
```

Custom Testcase ☐

Contribute Testcase

Run Code

Submit Solution

Run Code Status: Finished

Run Code Result:

Your input

"Hello, my name is John"

Your answer

5

Expected answer

5

Show Diff

Runtime: 48 ms

Note: is Run Code inconsistent with Submit Solution? If you are using global variables or C/C++, check this (/faq/#different-output) out.
